

Wild Things and Forest School

We are hoping to start Forest School at Hook Infant School soon.

We will be using the copse for a lot of the Forest School activities.

Forest School has outdoor activities linked to lessons like PE and Art as well as other activities like den building and making fires.

However...
we have a problem!

2015

2018

In 2018 several big trees were cut down in the copse because they had a disease called Chalara dieback fungus.

That is where Wild Things come in.

We will be helping to look after the copse for the school to use as a Forest School area.

Today's project

Wild Things will be tidying the pathways and making them safe for everyone to use.

We will be using the chippings from the old trees to make the paths.

Tools

We will also be making fences to help saplings grow safely and will be planting new trees in the spring.

We always stay with
our adult.

We always listen to
our adults.

OUR RULES

We never
run around.

We are careful with
plants and animals.

We don't pick any plants
or flowers unless we are
told by our adults.

We are sensible
with tools and
follow the rules
carefully.

We wash our hands
after touching plants or
animals, after going to
the toilet or before
having our snack.

We don't put
anything in
our mouths.

We need to be
quiet if we want
to watch
wildlife.

HAVE

FUN!
